The workbook is divided into 4 sessions that are usually presented in one day but can be broken into 4 group meetings. The program is meant to be incorporated into other program activities including the basic DUI education requirements for various states. Participants can read and complete the written material for each session and then share their responses in group. Alternately, some programs have the program facilitator read the beginning of each section to participants and then have them fill out the written material, so that all participants can work at the same pace.

This workbook has been adapted in several jurisdictional programs treating repeat DUI/DWI offenders where it is used in combination with the workbook *Thinking for Good*.

The workbook contains four pages with all fifty states' driver's license information for DUI/DWI offenders as well as individual state statistics. *A brief facilitator's guide is available for free, upon request, to programs using the workbook.*

Escaping A Bottomless Pit

Driving on a Revoked/Suspended License

Escaping a Bottomless Pit —More arrests are made each year for driving on a revoked/suspended license than for any other offense. However, there are few program options available for probation departments or private providers who seek a way to increase offender compliance and reduce rearrests. *Escaping a Bottomless Pit* is a 29-page workbook designed to be implemented in an 8-hour, open-ended group format that can be performed in a single day or in eight weekly one-hour group sessions.

The target population includes both adults or adolescents referred to programming for the offense of driving on a revoked or suspended license. The program is a brief intervention emphasizing the choices and consequences of their behavior and forces participants to make a plan of action focused on how to eventually drive legally. The program can be used in virtually any setting including specialized drug/DUI courts, community corrections, probation, and diversion programs. *A brief facilitator's guide is available for free, upon request, to programs using the workbook.*

Staying Quit

Relapse Prevention

Staying Quit—A 40-page client workbook based on the principles of cognitive-behavioral relapse prevention. Most relapse prevention workbooks are so detailed and intricate that the materials are too complicated for typical clients. *Staying Quit* is an 8-session program that focuses on risky situations, scripting changes, coping with urges and cravings, being around users, understanding support issues, and taking charge. Clients will tell you when and where they will relapse—and with whom—if you know how to ask. This enables you to target the most risky situations.

Staying Quit is targeted to individuals who are active in substance abuse programs of any type and any setting. Relapse prevention actually is the primary goal of treatment, but focusing on relapse prevention issues should take place sometime after the client is engaged in treatment and is not actively using substances. The program is in use in adult and juvenile substance abuse treatment programs in virtually any setting including drug/DUI courts, corrections, probation and parole, community corrections, diversion programs, and in private treatment settings.

The program has 8 modules completed in 8 group sessions supplemented by several sessions with a counselor or facilitator. Clients complete homework for each module prior to coming to group. In group each client presents his or her homework to the group and the facilitator passes the client to the next module or has the client redo the homework based on objective criteria.
